Attention: Walston Springs Water Supply Corporation Members

Re: Water Rate Structure

The Walston Springs Water Supply Corporation's Board of Directors has determined that the current water rate structure does not meet the revenue requirements of the water system. The water rate structure, set in **2013** does not meet the current operating expenses, water line relocations, water tower maintenance and emergency repairs.

In order to maintain superior operation of the water system's four deep wells and provide adequate and safe drinking water to you and the other 1,315 members, the Board of Directors appointed a Rate Committee. The Committee analyzed the most fair and equitable water rate adjustment possible for each member of the water supply Corporation.

Walston Springs WSC is very fortunate to have some of the best drinking water in the State of Texas and more importantly, it is SAFE. Our Sanitary Surveys conducted by the Texas Commission on Environmental Quality are in compliance with State and U.S. Government regulations. Furthermore, required samples testing of lead, copper, pesticides and other contaminants have resulted in being within the acceptable limits.

The Rate Committee presented their final proposal to the Board of Directors at the August 2015 Board of Directors meeting and they determined that the following adjustment will keep your rates one of the lowest in our area and provide additional revenue for the required maintenance of the water system.

CURRENT RATE STRUCTURE			NEW RATE STRUCTURE		
Minimum	1,000 gallons	17.00	Minimum	1,000 gallons	19.00
Next	9,000 gallons	3.00	Next	9,000 gallons	4.00
Maximum	-----	4.00	Maximum	-----	5.00

USAGE IS PER 1,000 GALLONS / RATE IS PER 1,000 GALLONS

THE WATER RATE ADJUSTMENT WILL BE EFFECTIVE WITH THE OCTOBER 2015 BILLING. If you have any questions, please feel free to contact the WSC office at 903-729-4236.

Sincerely,

Dan Glenn, President
Walston Springs Water Supply Corporation
